

The Sistership Dragon Boat Association has chosen to create a legacy for all the people in the community who have been diagnosed with breast cancer or have, in some way, been deeply affected by cancer.

This bronze monument depicts a dragon carrying breast cancer dragon boat paddlers working in unison, overcoming challenging waves, and padding together in their quest for renewed strength to conquer cancer.

These courageous paddlers are a testimony to the human spirit and living proof that there is an active life worth living following a cancer diagnosis.

This legacy art piece is also a memorial to honour those who have died from breast cancer and to acknowledge family members, caregivers, and supporters.

Sistership is forever grateful for the dignity and courage all have shown during their life journey.
